CAREER OBJECTIVE

Front-End Developer specializing in React.js and Next.js, building scalable, production-ready web applications with a strong focus on performance, maintainability, and user experience. Experienced in modern frontend architecture, state management, and responsive UI development.

WORK EXPERIENCE

Front-End Developer (Freelance), Self-Employed (July 2025 – Present)

- Engineered a full-stack-like frontend architecture for portfolio and blog platforms with secure authentication and dynamic content management (CRUD).
- Built Planora, a scalable event management application featuring ticketing, QR validation, and real-time data operations.
- Optimized rendering performance and reduced unnecessary re-renders through efficient state management and component structuring.
- Delivered responsive, production-ready interfaces using Tailwind CSS with a focus on performance and maintainability.

INTERNSHIPS & CERTIFICATION

(ITP), Frontend Cross Platform Mobile Application Track

- Information Technology Institute (ITI), Damanhur Branch (July 2025 – December 2025)

Route IT Training Center

- Frontend development diploma (December 2023 – April 2024)

EDUCATION

Bachelor's Degree in Information Technology - Faculty of Computers & Information - Damanhur University – Sep 2024

- Graduation Project: MidCare (Grade: A+)

PROJECTS

Planora - Event Management Web App | Graduation Project (ITI)
React.js • JavaScript • Tailwind CSS • Redux Toolkit • Supabase

- Built a scalable event management system with authentication, event creation, ticketing, and QR validation workflows.
- Tested with 30+ active users ensuring system stability and smooth user experience.
- Implemented real-time data synchronization using Supabase for seamless event and ticket updates.
- Reduced unnecessary re-renders and improved UI responsiveness through efficient state management using Redux Toolkit.
- Developed responsive, mobile-first UI with optimized component structure for performance and maintainability.

Ashraf Al-Muhtaseb – Portfolio & CMS Web App | Freelance Project
React.js • Tailwind CSS • Redux Toolkit • Spring Boot (REST API)

- Built a dynamic portfolio platform with a custom CMS enabling full content control without code changes.
- Enabled non-technical users to manage website content independently, reducing dependency on developers.
- Developed an admin dashboard to manage images, sections, and articles with real-time updates.
- Implemented SEO management system for dynamic control over meta tags, descriptions, and site settings.
- Managed 20+ content entries (images, sections, articles) through the CMS dashboard.
- Built reusable components and centralized state management to improve scalability and maintainability.

Maha – Booking Web App | Freelance Project
React.js • TypeScript • Tailwind CSS • Shadcn UI • Redux Toolkit • Supabase (Auth, Database, Storage)

- Built a booking platform with authentication, user management, and admin dashboard for handling consultations and reservations.
- Developed admin features to manage users, track bookings, and monitor system activity.
- Implemented real-time data synchronization using Supabase for seamless booking updates.
- Built an analytics dashboard displaying booking statistics over the last 30 days.
- Improved dashboard usability by providing clear booking insights and real-time updates.
- Optimized state management using Redux Toolkit to reduce unnecessary re-renders and improve performance.
- Supported 15+ test users performing concurrent booking operations with stable performance.

E-Commerce Angular Web App
Angular • TypeScript • Bootstrap • REST APIs

- Built a responsive e-commerce application with product listing, shopping cart, and dynamic routing.
- Implemented real-time cart updates with item count and total price calculation.
- Structured the application using a component-based architecture for scalability and maintainability.
- Leveraged Angular Signals for efficient state management and optimized rendering performance.
- Handled 20+ products with dynamic rendering and real-time updates.

TECHNICAL & SOFT SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Angular, HTML5, CSS3.

Styling & UI: Tailwind CSS, Shadcn UI, Bootstrap, SASS/SCSS, Responsive Design.

State Management & Logic: Redux Toolkit (Global State), React Hooks.

Tools : Git/GitHub, Figma (Design-to-Code), RESTful APIs Integration.

Soft Skills: Problem-solving skills, Effective Communication, Time Management and Organization, Attention to Detail
